Build Details

Release ID: TJ020	Project: TagJee	Build Owner: Mrinal, Rahul	Project Manager: Ashish
Start Date Planned: 26-10-2023	Actual Start Date: 26-10-2023	End Date Planned: 09-11-2023	Actual End Date: 23-11-2023

Scope

We have implemented **Vehicle Upload Button** in Manage RC Page in Web. Added **Min KYC** in my account page of Customer profile in TagJee web and app. Added **Customer OnBoarding** Page through Employee login in Reporting Module.

Build Descriptions

This release is a controlled release of TagJee and contains following features and functionalities.

Implementation:

- Implemented Vehicle Upload Button in Manage RC Page in Web.
- Added Min KYC in my account page of Customer profile in TagJee web and app
- Added Customer OnBoarding page in Reporting Module through Employee login.

Improvement not implemented in this build:

- Need to add button that will display the format in which excel sheet will be uploaded when you click on Upload vehicle button in Manage RC Page.

Improvement:

- Added drop-down for Agent in Customer OnBoarding page through Employee Login.

Bugs

:

- At Agent login end, user was entering vehicle no. and recharge transaction Id and click on check recharge status, it was not showing check recharge status summary.
- At Employee login end, User was clicking action button in vendor module and editing profile. Aadhaar No. fields remain saved even after starting from Zero and One.
- At Employee login end, Vehicle/Chassis Number text box field was shifting towards corner when user enters less than 16 digits in tag/bar code number in text box field.
- At Employee login end, Clear button was not working for area text box filter in master data module.
- At Customer login App, go to recharge summary. Tap on any recharge. Transaction ID was given NA.
- At Employee login, in customer report page inside Reporting module unable to download the data on excel sheet, when data comes from channel partner name, agent name and customer name filters.
- In Tagjee App, Generate RC for self option was not working.
- At Agent Login. Go to Customer Onboarding. Fill in all the fields with valid credentials except for OTP. Click on Create Account. It will Onboard that customer.

Configuration Management

We are using <<Configuration Tool>> as a configuration management tool. The build is available in the following path.

- **Internal Link:** <http://192.168.0.101:130/>

Installation Instructions and Steps

We login from Employee Credentials after login we check the users module, Administration, Master Data, Reporting Module, Account Module, and vehicle information menu. We checked from the App end on the Employee login module, Retailer CP & Retailer Agent, Dealer CP & Dealer Agent & Customer module. Tag Recharge from Employee & Customer Login End and also check customer on-boarding.

On Production (Live) (<https://www.TagJee.com>) login through valid Employee credentials we check the first Sanity of Both the App and web pages first. Then check the major module that is going in Build. We check customer onboarding and tag the Recharge module. Checked Tag Recharge (**DL1ZB1845**) from Employee Login & Customer Login, Checked to forget Password, checked WhatsApp Message, checked customer profile section from Employee & Customer End. Checked UI on customer login on the browser. We check major bugs and improvements on live on build day.
